

The Kompac Kwik Finish System comes complete with everything you need to ensure high quality results. Kompac provides a single source for all of your coating needs: knowledge, equipment, and consumables.

Specifications

Minimum Sheet Size: 127mm x 177.8mm	Maximum Coating Area: 349.3mm x 495.3mm
Maximum Sheet Size: 381mm x 508mm	Paper Thickness: 30 to 312gsm
Speed: up to 5500 Sheets per hour	Multiple Curing Selections (125/200/300W)
Overall Footprint: 1.22m x 4.88m	

Options:

- Kompac Kwik IR (for aqueous coating)
- Kompac Kwik Stack (automated stacker)
- Kompac Heat Shield (for toner based inks)
- Auto Level Sensing
- Kompac Vac Cleaning System

Consumables:

- Kompac Komplete Coatings (UV, Aqueous, Specialty)
- Kompac Komplete Coating Blankets
- Kompac Komplete Coating Film
- Kompac Coating Packing Material
- Kompac Replacement UV & IR Bulbs

Kompac provides everything you need to succeed in coating!

The **Kompac Kwik Finish**, an exciting new offline coating and curing system, provides a “kwik” and easy way to apply UV/aqueous coatings and primers to a wide variety of substrates. From offset to digital output, each job will have the lasting durability, protection and rub resistant finish that your customers require.

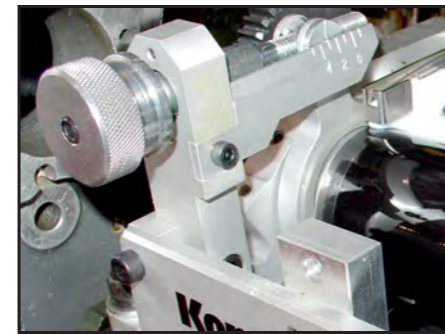

Features

- Easy to setup and operate
- Flood & spot coating capability
- “Kwik” and easy clean up
- Applies UV, aqueous, specialty coatings and primers (even coats “tough to coat” digital outputs)
- Handles a wide variety of substrates and thicknesses
- Changing jobs and coatings is “kwik” and easy

Kompac Kwik IR Infra-Red/Hot Air Drying System (Optional)

“Kwikly” dries aqueous and primer coatings and can be easily integrated into any Kwik Finish System or existing conveyor.

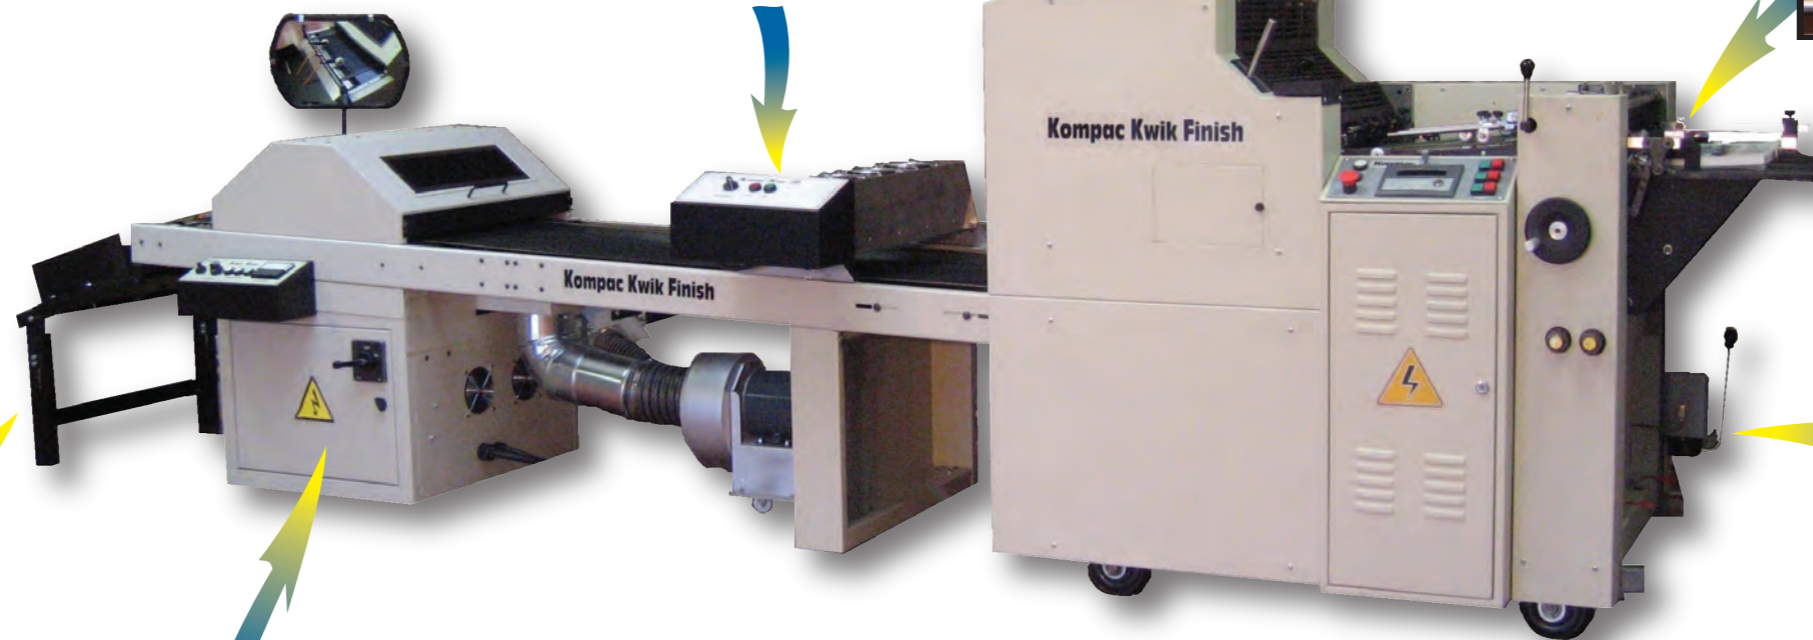

Kompac Kwik Coat (Patented Metering Controls) (Standard)

Provides “kwik” and easy adjustment of the coating film thickness, on the fly.

Automated Feeder (Standard)

Provides accurate registration for spot coating jobs as well as feeding a wide variety of stock weights and substrates.

Lubrication System (Standard)

Lubricates critical moving parts of the Kwik Finish System for long life and productivity.

Kompac Kwik Stack Automated Receding Stacker (Optional)

Automatically descends and jogs while stacking coated substrates for increased productivity and ease of operation.

PC Controlled (Standard)

The Kwik Finish is computer controlled and communicates with all of the Kwik Finish components (coater, IR dryer, and receding stacker) for your safety and the safety of the equipment.

Kompac Vac Cleaning System (Optional)

Enables operator to “kwikly” change jobs and coatings.

Benefits:

- Easy for your operator to set up and run
- Coating provides durability and protection for repeated handling and mailing
- Kompac provides total support for all of your coating needs
- Eliminates outsourcing (faster job turnaround and more profits!!)

The Kompac Advantage:

- Industry leader in premier graphic arts products for over 27 years
- World class quality (ISO 9001: 2000 certified)
- Worldwide distribution & technical support
- One stop shopping - Kompac provides everything you need to succeed in coating!

“For outstanding performance and quality, the Kompac Kwik Finish delivers it all in one complete system.”
